The Prez Sez

By Chris KJ6ZH

Happy 1994! I hope Santa brought you all the Ham goodies you wanted. So here we are, a new Year, a new Board for the club, Sunspots on the way down so not much on the HF bands, so what do you do, what do you do? Well the one bright spot in the month is the OCARC meeting. Lots of good friends, a good program this month and I hope you will notice the improvement in the raffle prizes. I and Jane (Activities) have discussed how to improve the raffle and, in so doing, maybe get more of you to show up at the meetings.

Some things that we need to do this year are get the club tower trailer operational, maybe establish an upgrading class for novice, techs, tech-lites (hint hint Jane), and preparing for Field Day. Speaking of Field Day, I think we can get on satellite this year by using RS-10 which is 2 meters up and 10 meters down. I have the radios to do this as well as the antennas so that can mean another 100 points for us.

Last but not least, Your Hobby needs your help once again. The Not-so-Honorable Janice E. Houghland of the New Jersey Department of Environmental Protection is proposing a tax of \$500 per year per transmitter antenna in the .3 - 1000 MHz range which is owned and operated by an RF Emmiter in New Jersey.

This money is supposed to go towards paying for the health costs of people exposed to this non-ionizing radiation (please note that NO health study to date has proven that RF in this range causes adverse health effects, but she dosen't want to be confused with the facts!). So what does this mean? Well, start adding up all your antennas; the 8 or 9 on the roof, the handitalkies, your cellular phone, your cordless phone(s), the antenna(s) on your car(s), well you should be getting the picture. For me, this would amount to \$10,500 PER YEAR! If this passes in New Jersey, how much do you want to bet that the Hacks up in Hackremento will want some of that action for cash starved California? We need to send a blizzard of mail protesting the misguided action of this New Jersey bureaucrat. Send a post card, QSL card, and/or letter to: Janice E. Houghland, New Jersey Dept. of Environmental Protection CN402, Trenton, NJ 08625-0404. My letter is on the way and I'm asking 5 of my relatives who live in New Jersey to also protest this action (they all can votel).

Well, 73 and see you at the meeting.

Chris - KJ6ZH
