A New Service

From Rosalie White, WA1STO

Do you know someone who's just recently passed that first license exam and is anxiously awaiting a brand new call sign? Recent FCC rule changes allow new hams to start operating as soon as the license is granted, and the Commission is now making licensing transactions available on a daily basis. Unfortunately, the FCC's phone lines are usually busy, so tell that eager new ham to call ARRL at 1 800 326-3942, between 8 AM and 4 PM Eastern Time, to easily and quickly get their new call sign. Best time to call is seven days after the exam. We want to get new hams active on-the-air as soon as possible, so let's help 'em.

Radio Amateurs To Observe 63rd Annual Field Day

Tens of thousands of amateur radio operators nationwide, will take to the wide open spaces this weekend, June 24, 25, to participate in the annual national event known as Field Day. The object of the event is to set up and operate on emergency power, a number of amateur radio stations; to work as many stations as possible on any or all amateur bands and in doing so learn to operate in abnormal situations under less than optimum conditions. A premium is placed on skills and equipment developed to meet the challenge of emergency preparedness and to acquaint the public with the capabilities of amateur radio.

The Field Day period is Saturday, 1800 to Sunday 1800 Universal Time (Saturday 11 AM to Sunday 11 AM PDT).

The Orange County Amateur Radio Club will

observe field day at the Marine Corps Air Station in Tustin, their annual site since 1991. The club placed 1st in California and 4th in the nation in it's class for 1994.

The Orange County Amateur Radio Club meets at 7:30 PM, on the 3rd Friday of each month at the American Red Cross, Orange County Chapter Headquarters, 601 N. Golds Circle Drive, Santa Ana, CA. Guests are welcome.
